

Engineering Services & Facilities at Agromec Technologies

1. Advanced CNC Routing Capabilities

- High-precision CNC Routing Machine for prototyping and manufacturing.
- Suitable for woodworkers, engineers, and designers.
- Enables the creation of intricate designs with accuracy and efficiency.

2. Cutting-Edge 3D Printing Solutions

- Access to industrial-grade 3D Printing Machine for rapid prototyping.
- Supports various materials for customized production.
- Ideal for engineers, product developers, and creative professionals.

3. Specialized Engineering Software & Programs

- Availability of industry-standard design and manufacturing software.
- Enables engineers to develop, simulate, and optimize their projects.
- Enhances productivity through advanced modeling and analysis tools.

4. Dedicated IT Room for Projects & Conferences

- Fully equipped IT Room for engineers to conduct research and development.
- Suitable for project collaboration, training sessions, and technical workshops.
- Secure and high-performance computing environment for engineering needs.
